

Hybrid Foam Technology

Personalized Comfort

Overview

Hybrid foam technology combines the conforming comfort benefits of memory foam with outstanding support and dramatically reduced temperature sensitivity. The Dynamic Air System provides enhanced support while greatly reducing pressure. This foam's exceptionally fine cell structure responds to pressure with a slow release, giving a gentle, fully customized and adjustable sleep surface. Scientifically formulated for use across a wide range of temperatures, Hybrid Foam's luxurious feel and comfort will remain consistent no matter the season or temperature.

Pressure Relief
